1st September 2022

Notice to introduce a new WebService for ITAS APIs

Hivedome will be introducing support a new WebService included in Trader Desktop version 8.15.0

Background

Trader Desktop version 8.15.0 will introduce a new WebService which will be utilised by ITAS to access online Microsoft features such as email and Teams. The WebService will have a secure and non-secure port:

WebService	Non-Secure Port	Secure Port
ITAS_GraphService	4780	5780

Further information on the new WebService can be found in ITAS Help.

Requirements

It's unlikely that any action will be required as these services and Windows Firewall updates should be completed during the deployment of Trader Desktop 8.15.0, but this information may be of interest where microsegmentation security is in place or ports used by ITAS/Trader Desktop are closely monitored.

For more information or assistance with this feature, please contact your ITAS representative or support team.
